Dear Students,

As we approach the end of summer, I write with reminders about the selection process for your Autumn Quarter courses (Pre-Registration), which takes place August 14 - 18.

To prepare for Pre-Registration, it is important you attend our August 11, 12:00 pm CDT webinar that will take you through the steps of the selection process.

Remember that the deadline for your required summer meeting with your Academic Adviser is this Friday, August 11 at 4:30 pm CDT. Having this meeting prior to the deadline will allow you to pre-register. If you have not already, schedule an appointment with your adviser through the College Scheduling site. If you will not be able to schedule your meeting prior to this date, email your adviser immediately.

Finally, your placements for Chemistry, Physics (based on math and AP/IB scores), Math and/or languages will be visible to you in the student portal (my.uchicago.edu) by the end of the day on Friday, August 11. Students interested in learning more about placements or who want to start Chemistry, Physics, or Math at advanced levels are encouraged to review the resources outlined below.

Best Regards,
Prepare for Autumn Quarter Pre-Registration

Placement Exam Results
Check the my.uchicago.edu student portal at the end of the day on August 11 to view your starting placements for Chemistry, Math, Physics (based on math and AP/IB scores), and/or language.

Virtual Info Session for Molecular Engineering Majors
Wednesday, August 9, 10AM CDT
Register Here
Professor Stoykovich, Director of Undergraduate Studies of Molecular Engineering, will host a virtual pre-registration information session for incoming first-year students interested in pursuing the Molecular Engineering major at UChicago.

Pre-Registration Webinar
Friday, August 11, 12PM CDT
Register Here
This webinar, hosted by the College Academic Advising Office, will discuss the Pre-registration process that takes place August 14 – August 18. Hear from current Academic Advisers on the how-tos and tips for registering for your first quarter of classes. You should also review the New Student Advising website for information about preparing for Pre-Registration.

Chemistry Virtual Open House
Friday, August 11, 1PM CDT
Register Here
This webinar, hosted by representatives from the Chemistry Department, will cover the Chemistry major at UChicago. It will also review how to understand your Chemistry placement and the different levels of general Chemistry. Finally, it will discuss the advanced placement exam and options for accelerated studies in Chemistry and/or
testing out of general Chemistry. * Students who receive an honors Chemistry placement will automatically be enrolled in and notified about the Chemistry advanced placement exam. » Important Info for Students Taking Chemistry

Math Webinar for Incoming Students
Monday, August 14, 10AM CDT
Register Here
This webinar, hosted by representatives from the Math Department, will explain all options regarding Mathematics placement and is open to ALL incoming students. The discussion will include:

- All possible Math placements, including descriptions of each Calculus sequence
- Math 180s, higher-level placements & making placement changes
- The Math Advising Team and procedures to schedule a meeting
- The Higher Level Math Exam and Calculus Accreditation Exam

Chemistry Advanced Placement Virtual Open House
Wednesday, August 23, 1PM CDT
Register Here
For students who successfully place out of general Chemistry, the Chemistry Department will have an additional webinar to go over class options in your first year, including possible tracks using advanced placement. *Students who receive an honors Chemistry placement will automatically be enrolled in and notified about the Chemistry advanced placement exam. » Important Info for Students Taking Chemistry

Physics Accreditation Exams
» Important Info for Students Taking Physics
For students with interest in taking the Physics Accreditation Exam which offers credit for PHYS 121 or PHYS 141, click the link above to learn about when and how to sign up for these exams.
